StockerTV

For trading platforms and banks

Market news your users watch. Inside your app.

StockerTV turns filings and Tier-1 financial news into short, sourced videos — validated against a 24-rule rulebook, approved by your team, and embedded with one snippet.

THE GAP

Your users make up their minds on social feeds — then open your app to trade.

74–89% of retail investor accounts lose money when trading CFDs.

Source: European Securities and Markets Authority (ESMA) — the risk-warning range EU CFD providers are required to display.

That's before anyone acts on a viral "tip". StockerTV puts sourced, rule-checked context inside the app where the decision is made.

WHAT YOU GET

A newsroom that runs itself, inside your platform.

- **Player on every stock page** — the story behind the move, per ticker.
- **Full-screen feed** with sound, captions in your users' language and a sourced transcript.
- **BUY / SELL hand-off** — the ticker goes straight to your own order ticket.
- **Your theme, your approval** — light or dark, nothing appears without your team.

HOW IT WORKS

1
It spots the story.
SEC filings and Tier-1 news, monitored around the clock across 32,190 companies.

2
The script is written.
A house style per story type; 70–95 words, built from sourced facts only.

3
It's validated.
Three layers check it against 24 rules. Anything uncertain goes to a human.

4
Your team approves it.
Then it plays in your app — minutes after the news broke.

TRUST

Three lines of defence. The last one is yours.

Forward-looking · Fair balance · Attribution · Market manipulation · Promotional language · Editorial neutrality · Disclosure

Boeing delivered ~~a stunning 150 jets~~ 150 jets in Q2 2025. Revenue ~~will keep soaring~~ rose to $22.7 billion . ~~Now is the time to buy the stock.~~ That's the operations update.

Every script keeps its sources, scores and decision history. No advice, ever. Governance pack available under NDA.

DESIGN PARTNERS

We're selecting our first design partners.

- **Scope** — markets, languages, and where StockerTV appears in your app.
- **Embed** — one snippet, your theme. Your team approves content from day one.
- **Measure** — KPIs agreed up front, reviewed together at the end.

No personal data about your users: the widget measures anonymous, aggregate engagement only.
